1. The specifications and drawings for Invitation No. DACW64-02-B-0021, Dredging, Barbours Cut Terminal Channel in Harris County, Texas, Houston Ship Channel, Texas, advertised 11 April 2002, and for which bids are to be opened on 14 May 2002, are hereby modified as follows:

(a) Specifications.

(1) Page 02482-1, Subparagraph 1.1.2. - After this Subparagraph, add the following new Subparagraph 1.1.3:

“1.1.3 Ditches. Three (3) ditches shall be excavated to the south spillbox as shown. A fourth ditch shall be excavated adjacent and parallel to the front of this spillbox, connecting with the three (3) ditches specified herein. These ditches shall facilitate draining ponded water through the dredge material that has built up in front of the spillbox.”

(2) Page 02482-3, Subparagraph 1.7.3. - After this Subparagraph, add the following new Subparagraph 1.7.4:

“1.7.4 Ditching shall not be measured for payment.”

(3) Page 02482-4, Subparagraph 1.9.3. - After this Subparagraph, add the following new Subparagraph 1.9.4:

“1.9.4 Ditching shall not be measured for payment.”

(4) Page 02482-4, Subparagraph 1.10.3. - After this Subparagraph, add the following new Subparagraph 1.10.4:

“1.10.4 Ditching. No separate payment will be made for ditching and will be considered a subsidiary obligation of the Contractor, the cost of which will be included in the contract unit price per cubic yard for “Dredging”.”

(5) Page 02482-8, Subparagraph 3.5.2. - At the end of this Subparagraph, add the following new Subparagraphs 3.5.2.1 and 3.5.2.2:

“3.5.2.1 Ditching at the South Spillbox. The work to be performed shall include mobilization and demobilization of the required equipment for removal and side-cast disposal of mostly soft, plastic clays with intermixed silts and sands, approximately to the dimensions specified below.

- (1) Three (3) ditches 3 feet deep with a 2-foot bottom width shall be excavated for a 500-foot length through dredged material that has built up in front of the south spillbox, as shown.
- (2) One (1) collector ditch 3 feet deep with a 2-foot bottom width shall be excavated adjacent, parallel to, and along the entire front of the south spillbox, connecting the three (3) ditches specified above

“3.5.2.2 Re-excavation. Due to the nature of the work and because the excavation is in very soft muddy soils, the Contractor may be directed to re-excavate a segment of the work that has slumped or collapsed, causing a constriction of the flow of water to the south spillbox.

(b) Drawings.

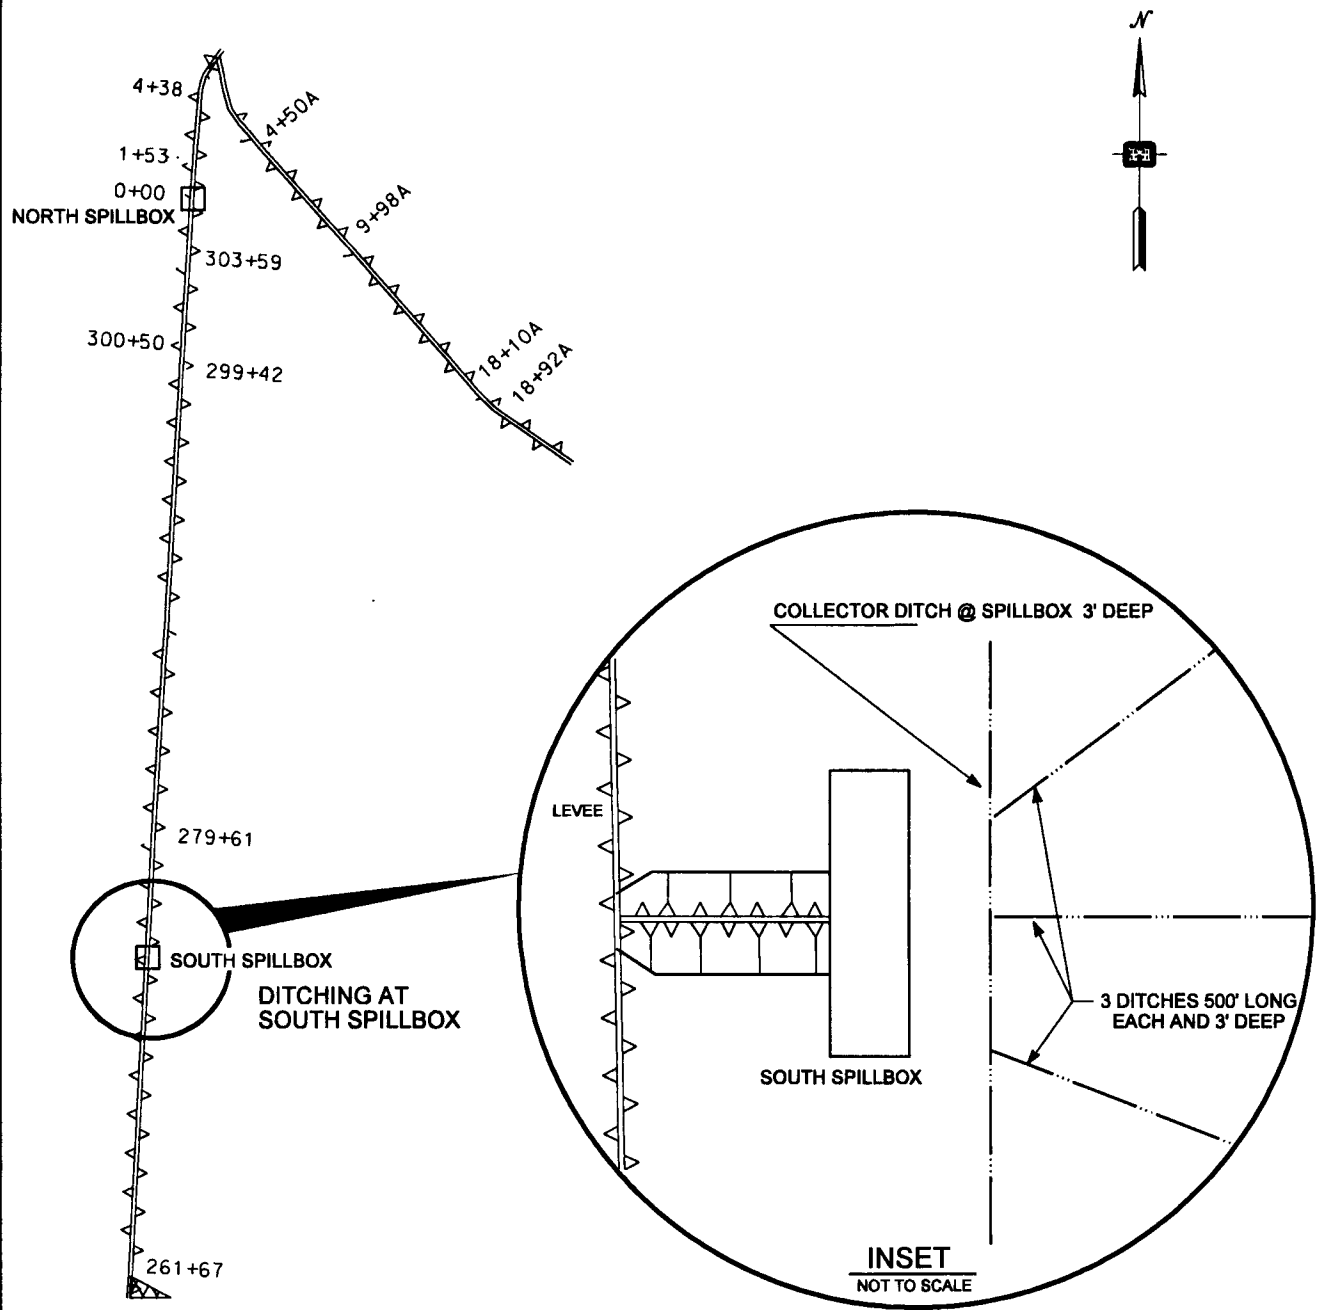

(1) Sheet 2 of 5. - On the PLAN, delete ‘EXISTING SPILLBOX” and substitute “SOUTH SPILLBOX.” Also, at LEVEE STATION 0+00, add “NORTH SPILLBOX” to show the location of the spillbox.

(2) SKETCH NO. 1. - The enclosed new SKETCH NO. 1 shall be attached to and become part of the contract drawings to this Invitation.

2. This amendment shall be attached to, and become a part of, the specifications.
